<b>Office Action Summary</b>	<b>Application No.</b> 10/542,764	<b>Applicant(s)</b> KISHINAMI, ISAO	
	<b>Examiner</b> JENNA A. WATTS	<b>Art Unit</b> 4132	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a grain immersion method.

Group II, claim(s) 4-6, drawn to a grain immersion apparatus.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The common technical feature between Groups I and II can be identified as a pressure-resistant container having a connecting port for creating a vacuum. However, Claims 1 and 2 of Group I, which impliedly incorporate this claim limitation, are anticipated by EP1264546 to Kuwa. Kuwa teaches placing foods such as grains and liquids such as water in a container, and introducing the container into a pressure reducing apparatus to conduct the vacuum treatment, which requires a connecting port for achieving pressure reduction to vacuum. The resulting foods are then subjected to pressurization, which is usually conducted by releasing the vacuum state to raise the pressure to nearly atmospheric pressure (Paragraphs [0026], [0040], [0055] and [0056]). Therefore, there is no special technical feature of the claimed invention between the claim groups since the identified common technical feature is not found to

define a contribution over the prior art. In this light, there is a lack of unity of invention and a restriction is proper.

4. A telephone call was made to Mr. Surinder Sachar on October 30, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

6. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

### ***Conclusion***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to JENNA A. WATTS whose telephone number is (571)270-7368. The examiner can normally be reached on Monday-Thursday 9am-5pm.
